

Dear Hiring Manager,

I'm writing to express my interest in the Machine Learning Engineer position at your company. I have 9 months of experience in Artificial Intelligence and Machine Learning. During my time at Vmukti Solutions Pvt Ltd, I worked on projects involving custom object detection using advanced technologies like YOLOv5, YOLOv7, and YOLOv8. These projects required a good understanding of computer vision and image processing.

At Future 18, I continued to work on various projects such as SMS Spam Detection, Fake News Detection, Chatbot Development, and creating a personalized Jewellery Recommendation System. These experiences helped me improve my skills in machine learning and data analysis.

I am attracted to your company because of its reputation in AI and ML technologies. I believe my practical experience with custom object detection using YOLO frameworks, along with my willingness to learn, aligns well with your company's goals.

Thank you for considering my application. I look forward to the opportunity to contribute to your projects and grow in this field.

Best regards,
Rahul Adidraavid
